I'm starting the 7-Day DevOps challenge!

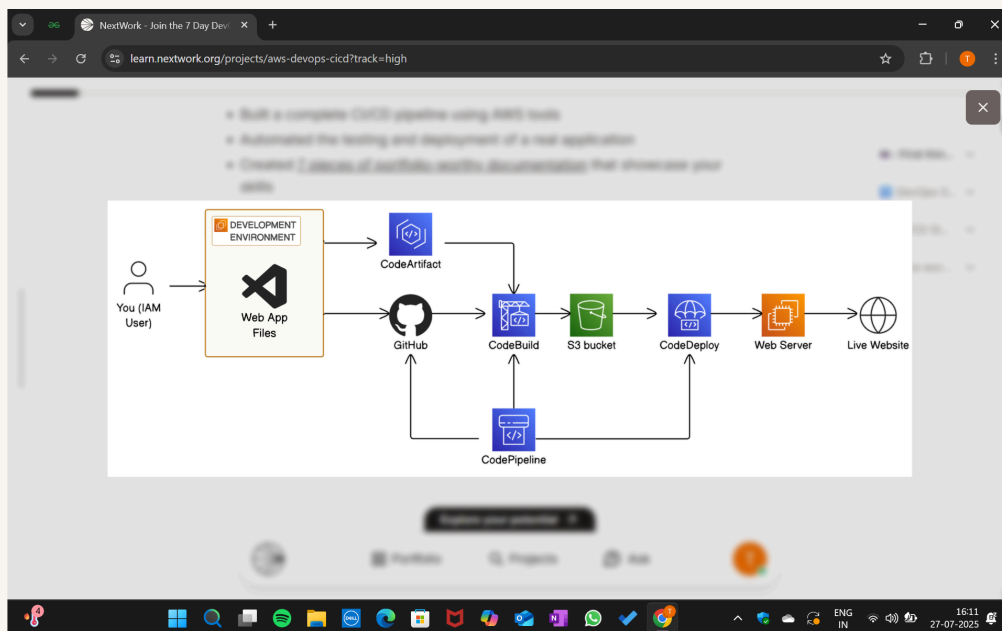

Tanikasri SenthilKali Dass

I'm building a CI/CD pipeline in 7 days

In this DevOps Project, I'm learning to built a complete CI/CD pipeline, I have Set Up a Web App in the Cloud Connected a GitHub Repo with AWS Stored Dependencies in CodeArtifact Packaged an App with CodeBuild Deployed an App with Cod

Hold me accountable!

I will set aside time every day for a week to work on this challenge. I will keep myself accountable by checking my progress on a daily basis, My reward for completing this challenge will be a relaxing weekend break or a small treat of my choice.

What is DevOps?

DevOps is a set of practices that combines development (writing code) and operations (deploying and maintaining code) to shorten development cycles and deliver reliable software. DevOps engineers implement Build automated pipelines and Containerize.

What is CI/CD?

CI/CD stands for continuous integration and continuous deployment. This process helps teams by automatically integration new changes in code and deploy them in the website.

Excited to share my progress - do this challenge with me!
